Work Experience

[Simutomy MedTech Pvt Ltd](#)

UI/UX Designer (Current) ← Jr UI/UX Designer ← UI/UX Design Intern Aug 2023 – Present

- Oversaw the entire product design process for [VisceR](#) and SaaS products, from wireframes and user research to system design and developer handoff.
- Enhanced usability across VR and web products through incremental improvements, usability testing, and customer feedback.
- Worked together on feature planning, design quality assurance, product demos, and user training with founders, developers, and clients.
- Designed and improved the product interfaces, which led to better user flows, increased accessibility, and more consistent visual appearance.
- Created wireframes, prototypes, and high-fidelity UI while validating releases through bug verification and design quality assurance.

Digital Illustrator

Feb 2021 – May 2021

- Created character designs and environments for animation projects using Adobe Illustrator.

Projects

You Matter App | Smart Insurance Planner: – [View Case Study](#) Nov 2025

- Revised the process for onboarding customers for insurance in order to reduce the mental burden and the number of people who drop off.
- Designed a guided 7-step flow, improving task completion noticeably based on moderated usability sessions post-launch.

Star Union Dai-ichi Life Insurance | Member Portal Redesign: – [View Case Study](#) Sept 2025

- Audited the existing member dashboard for navigation failures and visual hierarchy issues, rebuilt the information architecture around the top 5 user tasks identified in research.
- Client reported measurable improvement in task completion and satisfaction after launch validated through follow-up feedback sessions.
