Work Experience

Simutomy MedTech Pvt Ltd | UI/UX Design Lead

Aug 2023 – Present

Sole designer in a 4–person IIT Mumbai startup building [VisceR](#) a VR-based surgical training platform.

- Owned the full design function, from UX research and information architecture through to VR interaction design, visual UI, and developer handoff, with no prior design foundation to build on.
- Redesigned core VR interaction flows based on usability testing findings; reduced observed user errors and navigational friction across 3 testing cycles with medical professionals.
- Built a structured QA process for design-to-dev handoff, reviewing shipped builds against design specs and flagging visual drift before client releases, materially reducing visual regression in production.
- Conducted on-site user training sessions and live client demos, documenting and converting field observations directly into product decisions alongside the founding team.
- Represented the product at international client engagements, including an on-site visit in Georgia, presenting UX decisions to clinical stakeholders with no design team support.

Digital Illustrator | **Character And Environment Designer**

Feb 2021 – May 2021

- Created character designs and background environments for animation projects using Adobe Illustrator. Focused on making sure the visuals stayed consistent and matched the storytelling goals of each project.

Client Projects

You Matter App | **Smart Insurance Planner:** – [View Case Study](#)

Nov 2025

- Identified drop-off points in the insurance onboarding flow through user research; redesigned the input sequence using progressive disclosure and contextual micro-interactions.
- Replaced a single long form with a guided 7–step flow, improved task completion rate based on moderated usability sessions post-launch.

Star Union Dai-ichi Life Insurance | **Member Portal Redesign:** – [View Case Study](#)

Sept 2025

- Audited the existing member dashboard for navigation failures and visual hierarchy issues; rebuilt the information architecture around the top 5 user tasks identified in research.
- Client reported measurable improvement in task completion and satisfaction after launch — validated through follow-up feedback sessions.

Technical Skills

Design Tools: Figma, Framer, DaVinci Resolve, Adobe Illustrator, Adobe Photoshop, Unity (VR UI), Canva, AI Tools

Industry Skills: Product Design, Interaction Design, User Interface Design, UX Research, Wireframing, Design System, Prototyping, Usability Testing, Visual Design, Design Thinking, Information Architecture, Illustrations

Workflow: Cross-functional collaboration, Client communication, Problem solving, Critical thinking, Design Handoff, Agile/Scrum

Certifications

• IBM | [Designing User Interfaces and Experiences \(UI/UX\)](#)

May 2025

• Google | [Google UX Design Specialization](#)

Jun 2024

Education

Chetana's Hazarimal Somani College of Commerce & Economics

Mumbai, India

Bachelor of Commerce (Bcom General) (CGPI: 9.17)

Aug 2020 – June 2023
